

BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

June 2013: Economic sentiment improves markedly in both the euro area and the EU

In June the *Economic Sentiment Indicator* (ESI) improved markedly, continuing last month's increase. Sentiment increased by 1.8 points in both the euro area (to 91.3) and the EU (to 92.6).

Euro area developments

In the euro area, the increase was driven by brightening sentiment among consumers and managers in all business sectors except for services, where assessments remained broadly unchanged. All the five largest euro area economies saw sentiment improving, namely Spain (+2.5), Italy (+1.7)¹, France (+1.3), Germany (+1.1) and the Netherlands (+0.9).

The increase in **industry confidence** (+1.8) resulted from a much more positive assessment of the current level of *overall order books* and *production expectations*, while managers' assessment of the *stocks of finished products* remained broadly unchanged. The positive overall developments were also reflected in an improving assessment of the current level of *export order books*, while the assessment of the *past production* worsened (the latter two questions are not included in the confidence indicator). **Services confidence** remained broadly stable (-0.3). Managers' negative assessment of the *past business situation* was mitigated by marginally more positive assessments of *past demand* and *demand expectations*. **Consumer confidence** increased markedly (+3.1) and for the seventh consecutive month. Consumers were significantly less pessimistic concerning the *future general economic situation*. Also their *unemployment* and *savings expectations* and their assessment of the *future financial situation* of their households became less gloomy.² **Retail trade confidence** rose markedly (+2.3), mainly driven by brightening appraisals of the *present business situation*, but also by less pessimistic *business expectations* and improving assessments of the *volume of stocks*. **Construction confidence** improved as well (+1.4), resulting from a less negative assessment of both *order books* and *employment expectations*. Also **financial services confidence** (not included in the ESI) picked up (+0.7), driven by better assessments of the *past business situation* and *past demand*, which offset worsened *demand expectations*.

Employment plans were revised upwards in construction and downwards in retail trade, while remaining broadly unchanged in industry and services. **Selling price expectations** increased in industry and construction, while remaining stable in services and retail trade. Consumer price expectations increased slightly.

EU developments

In the wider EU, developments differed only slightly from the euro area. Confidence in the two largest non-euro area EU economies decreased slightly, by 0.7 points in the UK and 0.6 points in Poland. On a sector-basis the main difference with the euro area was a marked improvement in services confidence (+1.7), resulting chiefly from a significant rise in UK services confidence. On the other hand, industry confidence improved somewhat less (+1.0). As in the euro area, EU financial services confidence increased by 0.7 points. In slight contrast to the euro area, employment plans improved in retail trade and services, and EU selling price expectations rose in all business sectors except for services. Consumers in the EU expect prices to remain broadly stable.

¹ The Italian survey results are subject to some methodological improvements concerning sampling and survey techniques that could affect data comparability with previous months.

² It has to be noted that these improvements were driven to some extent by a significant improvement in Italian consumer data.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	23 July 2013
	Economic Sentiment Indicator	30 July 2013
	Business Climate Indicator for the euro area	30 July 2013
