APFIPP shall be held responsible neither for inexact or deficient data provided by these entities nor for the results of analyses and of classifications drawn up on the basis of deficient or incorrect data.

APFIPP shall not be held responsible for third party manipulation of the data or information contained in this file.

APFIPP does not exclude the validity of other methodologies for the calculation of the returns and volatility of the Funds identified in this file or for their inclusion in risk classes.

The information contained in this file does not constitute investor counseling of any type, which should be provided by professional entities, nor does it dispense consultation of other information, particularly the Disclosure System of the CMVM – Comissão de Mercado de Valores Mobiliários and the information published officially by the Management Entities or by entities charged with the placement and marketing of the securities in question.

The yields published represent past data, and do not constitute a guarantee of future returns, since the value of the units may increase or decrease in accordance with the level of risk, which varies between 1 (minimum risk) and 7 (maximum risk).

The price of the Funds included in the category "Funds denominated in USD" is expressed in USD. This means that the returns and risk presented for these Funds are not directly comparable with those of other categories of Funds.

The reproduction of the information contained in this file is the responsibility of its user who must give notice to any third party of the content of this disclaimer, under penalty of being held liable for the losses that disregard therefore might cause to or to any third party.

FEES

The calculations do not include subscription and redemption fees, as well as any other charges or expenses paid directly by the unit-holders. These fees and other expenses vary in accordance with the conditions set out in the Prospectus of each Fund.

The Category "Open Pension Funds" includes Funds for which the returns present are net from management fees and Funds whose presented returns are gross form those charges. Both situations are duly marked and it is presented the management fee for the Funds with net returns.

TAXATION

The price of the Funds is presented net from taxes.

Equity Savings Funds' (PPA) and Retirement Savings Funds' (PPR) performance does not take into account any tax incentives foreseen for these Funds.

As long as the Pension Funds are eligible from a tax point of view and within the limits established by law, the annual contributions to Pension Funds can be considered tax deductible.

The income received by Pension Funds is exempt from Corporate Income Tax (IRC).

Benefits paid by Pension Funds are subject to Personal Income Tax (IRS) and taxed as wages and/or capital or as pensions, according to the moment, the amount and the form that the payment of the benefits assumes. The prices presented for these Funds are subject to taxation according to the legislation in place.

The calculation of the performance does not take into account the taxation that these Funds are subject to at the time of reimbursement.

METHODOLOGY

RETURNS

The returns are calculated from the net prices of the Funds, although for some Pension Funds, duly marked, the prices considered does not include the management fee. Calculation is made in accordance with the formulae below that assume that dividends are reinvested free of subscription fees at the following price that reflects the decrease caused by the dividend. The calculation of returns does not take into account any subscription or redemption fees.

As of December 30, 2005, inclusive, the returns and risk began to be calculated based on the valuation date, rather than on the reporting date, as had been happening so far. Thus, from this date forward, the final price of the Fund considered in the calculation will always be the one valued at the day the calculus refer to. However, the price series before December 30, 2005 remained unchanged. Therefore, for calculation periods beginning before that date, the initial price considered in the calculus will be the one disclosed on that date and not the one valued on that date.

However, the Fund price presented in this file is the one disclosed by the Management Company associated with the date in question and therefore may not be the price that was used to calculate the returns and risk.

$$\text{CUMULATIVE RETURN} = \left[\frac{UP_f}{UP_i} * \prod_{i=1}^f \left(1 + \frac{R_j}{UP_j} \right) \right] - 1$$

$$\text{ANNUALIZED RETURN} = \left[\frac{UP_f}{UP_i} * \prod_{i=1}^f \left(1 + \frac{R_j}{UP_j} \right) \right]^{\frac{365}{n}} - 1$$

VOLATILITY

Obtained from the standard deviation of weekly returns, or monthly returns if the Fund do not disclose its price on a weekly basis, according to the following formulae:

$$\text{VOLATILITY} = \sqrt{\frac{1}{m-1} \sum (x_i - \bar{x})^2} * 100$$

$$x_i = \left(\frac{UP_t}{UP_{t-1}} \right) * \left(1 + \frac{R_j}{UP_j} \right) - 1 \quad \bar{x} = \frac{1}{n} * \sum x_i$$

UP_t - Price of the Fund at the end of the calculation period

R_j - Dividend paid by the Fund at time j

n - Number of days of the calculation period

m - Equal to 52 or 12 depending if the considered returns are weekly or monthly

UP_{t-1} - Price of the Fund at the beginning of the calculation period

UP_d - Price of the Fund after the dividend is paid at time d

UP_t - Price of the Fund at the last business day of the week / month

T - Number of weekly / monthly returns observed in the calculation period

RISK CLASSES

The classification of the level of risk is made in accordance with the following table:

Risk Classes	Volatility gap	
	Greater than or equal to	Less than
1	0.00%	0.50%
2	0.50%	2.00%
3	2.00%	5.00%
4	5.00%	10.00%
5	10.00%	15.00%
6	15.00%	25.00%
7	25.00%	

CLASSIFICATION

Fund Classification is made according to the criteria established by APFIPP and taking into account the Funds' objectives, their investment policies and the portfolio holdings at the end of January, February and March 2014.

MONEY MARKET FUNDS – Funds that invest exclusively in Money Market instruments and deposits of high quality, shares / units of "Fundos do Mercado Monetário Curto Prazo" (Short Term Money Market Funds) and of "Fundos do Mercado Monetário Curto" (Money Market Funds), and derivatives, although derivatives which give exposure to foreign exchange may only be used for hedging purposes. (1) The date of reference for the return and risk presented is August 12, 2014

* - As of December 30, 2005, inclusive, the returns and risk began to be calculated based on the valuation date, rather than on the reporting date, as had been happening so far. Thus, from this date forward, the final price of the Fund considered in the calculation will always be the one valued at the day the calculus refer to. However, the price series before December 30, 2005 remained unchanged. Therefore, for calculation periods beginning before that date, the initial price considered in the calculus will be the one disclosed on that date and not the one valued on that date.

** - The Fund price presented in this file is the one disclosed by the Management Company associated with the date in question
