

DISCLAIMER

The information contained in this file has been drawn up in accordance with the methodology described below and taking into account the data provided by the Management Entities.

APFIPP shall be held responsible neither for inexact or deficient data provided by these entities nor for the results of analyses and of classifications drawn up on the basis of deficient or incorrect data.

APFIPP shall not be held responsible for third party manipulation of the data or information contained in this file.

APFIPP does not exclude the validity of other methodologies for the calculation of the returns and volatility of the Funds / Sub-Funds identified in this file or for their inclusion in risk classes.

The information contained in this file does not constitute investor counselling of any type, which should be provided by professional entities, nor does it dispense consultation of other information, particularly the information published officially by the Management Entities or by entities charged with the placement and marketing of the securities in question.

The yields published represent past data, and do not constitute a guarantee of future returns, since the value of the units may increase or decrease in accordance with the level of risk, which varies between 1 (minimum risk) and 7 (maximum risk).

The reproduction of the information contained in this file is the responsibility of its user who must give notice to any third party of the content of this disclaimer, under penalty of being held liable for the losses that disregard therefore might cause to or to any third party.

The Funds / Sub-Funds included in this file may be denominated in a currency other than EUR and for that reason, for each Fund / Sub-Fund it is presented the respective currency.

All *calculi* are based on the price of the Fund's / Sub-Fund's share expressed in the respective currency. Therefore, the returns and volatility presented for Funds / Sub-Funds denominated in different currencies are not directly comparable.

The share prices presented and used in the calculation of returns and volatility refer to the following share classes: Share Class A for SICAV F&C Portfolios Fund; Share Class B Accumulation for SICAV Schroder International Selection Fund (SISF); and Share Class A for SICAV Fidelity I and SICAV Fidelity II.

The returns and risk classes presented for Comstage ETF's Funds are based on the respective NAV (Net Asset Value). This means that the prices negotiated in the stock exchange are not taken into consideration. Therefore, also the price presented for these Funds is the respective NAV and not any price negotiated in the stock exchange.

The calculations do not include subscription and redemption fees, as well as any other charges or expenses paid directly by the unit-holders. These fees and other expenses vary in accordance with the conditions set out in the Prospectus of each Fund / Sub-Fund.

Share Prices are presented net from management and depositary fees.

The Categories of the Funds / Sub-Funds presented in this file are defined by the Management Companies that are also responsible for the inclusion of the Funds / Sub-Funds into those categories.

Unlike Portuguese domiciled Investment Funds, the Funds / Sub-Funds presented in this file are not subject to withholding tax in Portugal and, therefore, the share prices presented are gross from due taxes. Investors to these Funds that are Portuguese residents are subject to taxation at the time of reimbursement, at a separate rate of 28% (if the investor is a Portuguese resident individual). If the investor is a company subject to Corporate Income Tax (IRC), the income obtained from the participation must be added to the total annual taxable profit of the company and taxed accordingly. In case of sale to another investor (secondary market), the income obtained from that sale is considered a capital gain and the tax regime for capital gains applies.

From the above explanation it follows that both returns and volatility presented in this file are gross from taxes and therefore it is not possible to compare directly the returns and volatility presented for Portuguese domiciled Funds with those of Foreign domiciled Funds, even if they have similar investment policies.

METHODOLOGY

RETURNS

The returns are calculated from the share Funds, which are net from management and depositary fees but gross from taxes, because these Funds are not subject to withholding taxes. Calculation is made in accordance with the formulae below that assume that dividends are reinvested free of subscription fees at the following price that reflects the decrease caused by the dividend.

The returns are calculated based on the share prices expressed in the currency of the Fund / Sub-Fund.

The calculation of returns does not take into account any subscription or redemption fees.

$$CUMULATIVE\ RETURN = \left[\frac{UP_T}{UP_i} * \prod_i \left(1 + \frac{R_j}{UP_j} \right) \right] - 1$$

$$ANNUALIZED\ RETURN = \left[\frac{UP_T}{UP_i} * \prod_i \left(1 + \frac{R_j}{UP_j} \right) \right]^{\frac{365}{n}} - 1$$

VOLATILITY

Obtained from the standard deviation of weekly returns, or monthly returns if the Fund do not disclose its price on a weekly basis, according to the following formulae:

$$VOLATILITY = \sqrt{\frac{m}{(T-1)} * \sum (x_i - \bar{x})^2} * 100$$

$$x_i = \left(\frac{UP_t}{UP_{t-1}} \right) * \left(1 + \frac{R_j}{UP_j} \right) - 1$$

$$\bar{x} = \frac{1}{n} * \sum x_i$$

UP_T - Price of the Fund at the end of the calculation period

R_j - Dividend paid by the Fund at time j

n - Number of days of the calculation period

m - Equal to 52 or 12 depending if the considered returns are weekly or monthly

UP_i - Price of the Fund at the beginning of the calculation period

UP_d - Price of the Fund after the dividend is paid at time d

UP_j - Price of the Fund at the last business day of the week / month t

T - Number of weekly / monthly returns observed in the calculation period

RISK CLASSES

The classification of the level of risk is made in accordance with the following table:

Risk Classes	Volatility gap	
	Greater than or equal to	Less than
1	0.00%	0.50%
2	0.50%	2.00%
3	2.00%	5.00%
4	5.00%	10.00%
5	10.00%	15.00%
6	15.00%	25.00%
7	25.00%
